

AYAAN GOPAL RAY

743-987-4962 | ayaan.ray@gmail.com | [linkedin.com/in/ayaanray](https://www.linkedin.com/in/ayaanray) | github.com/kantandesu

Nationality: *American, Overseas Citizen of India (OCI)*

EDUCATION

Netaji Subhash Engineering College

Bachelor of Technology in Artificial Intelligence and Machine Learning

Kolkata, WB

August 2023 – June 2026

Techno Main Salt Lake

Diploma in Computer Science and Technology

Kolkata, WB

December 2020 – July 2023

EXPERIENCE

Mobile Application Development Intern | *React Native, Expo, Node.js*

February 2025 – May 2025

Snowy Software Private Ltd.

Kolkata, WB

- Authored detailed system design and user flow diagrams to support development and onboarding.
- Actively contributed to bug fixing across the codebase, including resolving a critical issue, restoring full functionality and **reducing crash rates by 90%**.
- Wrote and maintained the project's core documentation, including technical specifications and user guides.
- Monitored API usage through Google Cloud Console to aid in performance tuning and cost estimation.
- Tested and validated Android builds to ensure stability and deployment readiness.

PROJECTS

NaariKavach - Hackolution '25 | *React, TailwindCSS, JavaScript, Node.js*

June 2025

- Co-developed a real-time surveillance platform that leverages ML-based CCTV footage analysis, distress reporting, and centralized police monitoring to enhance women's safety.
- Designed and developed a visually engaging user interface using React, integrating Three.js for interactive 3D elements and GSAP for smooth scroll-based animations.
- Built a role-based admin dashboard with WebSocket implementation using Socket.IO for real-time alerts, live CCTV footage analysis, and dispatch functionality for emergency response coordination.
- Integrated Google Maps API to visualize dynamic distress call locations and route activity for police response.
- Collaborated with backend and ML team members to integrate REST API for surveillance data and incident tracking.

Dishastra - Nirmiti 2024 | *React, JavaScript, Node.js*

August 2024 – Present

- Spearheaded frontend development for an entrepreneurship initiative focused on a navigation platform designed for GPS-constrained environments.
- Translated high-fidelity Figma designs into a responsive and polished user interface using React and Tailwind CSS.
- Integrated the Mapbox API to build an interactive, optimized map interface to display navigation information.
- Played a key role in refining the UI/UX through iterative feedback and testing, enhancing usability.
- Collaborated effectively with fellow team members to integrate a Python-based machine learning model into the application workflow.

RESEARCH UNDERTAKEN & ACHIEVEMENTS

Saikat Bandopadhyay, Debrup Sengupta, Raunak Saigal, Sagnik Sinha, Ayaan Gopal Ray, Aryaman Jha, Anupam Ghosh. *"CalWatch: An AI-Blockchain Integrated Framework for Personalized Nutrition and Sustainable Digital Health Engagement."* **Applied Soft Computing**, Status - Accepted.

Winner of Hackolution '25

June 2025

- Awarded first place at a 36-hour inter-college hackathon hosted by IEM, from among a total of 18 teams.

Winner of Nirmiti 2024 Tier-I

October 2024

- Secured first prize at a two-day startup conclave hosted by RERF, in which more than 38 colleges participated.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, HTML/CSS, Python, SQL

Frameworks: React, React Native, Expo, Node.js, TailwindCSS

Libraries: Three.js, Fabric.js, CanvasJS, GSAP, Socket.IO, pandas, NumPy, Matplotlib, Tensorflow

Developer Tools: Git, Google Cloud Platform, Visual Studio Code, Cursor

Design Tools: Figma, Canva

CERTIFICATES

Coursera

Google IT Support Professional Certificate

Online

September 2023 – December 2023
